Before using it for the first time, brush out the inside to release any loose clay particles. To prepare for cooking for the first time, immerse it in a clean bucket of water for at least 2 hours. You may leave it overnight in a sink completely covered with water. Remove the pot from the water and allow it to dry thoroughly. The water retained in the clay provides the moisture necessary for cooking.

Season your pot in these 3 simple steps. Fill the pot 1/4 way up with water. Add 1 tablespoon of any flour (arrowroot, wheat, whole wheat, rice, all-purpose). For Large and X-Large pot, use 2 tbsp. Stir, cover and cook on low to medium heat till it thickens to a broth (about 30-35 minutes). Let the mixture cool down, pour out, scrub and rinse the pot thoroughly.

Do not heat an empty pot. Do not use the pot for deep frying. Hand Wash Only.
